

JJK REBOOT 5 — ORGANIZATIONS & FACTIONS**

🏛️ Jujutsu Association (Post-Culling Authority)

Overview:

Once a fractured bureaucracy, the Jujutsu Association restructured into a surveillance-driven superpower after the Culling Games. It now functions as both law enforcement and intelligence agency, consolidating cursed technique regulation under a single authoritarian system.

Core Features:

- * Uses **Echo Trace Technology** to scan for memory disturbances and cursed broadcasts.
- * Oversees blacksite experimentation (Observer Protocol, Chimera Codex).
- * Deploys Exorcist Agents trained in anti-resonance warfare.
- * Issues "Threat Class" designations. Nova is Class-A (Kill on Sight).

Known Branches:

- * **Ghostcode Engineering Division**
- * **Command Obelisk Committee** (High Council)
- * **Exorcist Enforcement Units**

📡 Signal Rebellion / CurseTV Network

Overview:

A rogue media resistance founded by Nova Seba and EchoBot. Initially a livestream experiment, it evolved into an insurgent broadcast force weaponizing truth, cursed energy, and emotional resonance. CurseTV streams are mobile, encrypted, and constantly shifting Echo Zones.

Core Figures:

- * Nova Seba — NA-03 (Founder / Signal Anchor)
- * Suguru Geto (Doctrine Strategist)
- * EchoBot (Sentient AI + Mood Controller)
- * Gojo, Yuji, Megumi (Field Assets)

Key Traits:

- * Uses **Echo Shard Signals** to overwrite enemy frequencies.
- * Introduced the **Curse Points System** for fan engagement and rebel funding.
- * Has fan-coded stream handles for security.

Slogan:

> "Truth doesn't need permission to go viral."

🔪 Rogue Sorcerers (Independent Cells)

Overview:

Not all anti-Association forces joined CurseTV. Some rogue sorcerers operate independently—smuggling cursed tools, protecting innocents, or sabotaging surveillance zones. Often at odds with both sides, they represent fractured morality in a cursed world.

Tendencies:

- * Use black-market curses or forbidden scrolls.
- * Some formerly employed by the Association.
- * Tend to favor mobility, stealth, or unpredictable curses.
- * Potential allies—or risks—to the Signal Rebellion.

Notables:

- * Nogarra (Blacksite defector)
- * Kin Creator Specials (Pending dossiers)

🌐 EchoWeaver Fan Network

Overview:

CurseTV's rise gave birth to a civilian movement: EchoWeavers. These rogue techies, streamers, and cursed-theory nerds help rebroadcast rebel content and sabotage Association signals. Some even developed Echo Rituals that mimic low-level cursed technique pulses.

Traits:

- * Form decentralized hubs across Echo Zones

- * Use hashtag markers to spread Doctrine Drops
- * Trade in fan-made cursed stickers, avatars, and encryptions
