

JJK REBOOT 4

— TECHNIQUES, DOMAINS & SIGNATURE MOVES**

NOVA SEBA — STARFALL PROTOCOL & RESONANT ARTS

Starfall Protocol

A cursed-tech combat suite unlocked through sync with the Star Plasma Shard. Combines memory recursion, emotional frequency bursts, and digital field overlays.

* **Echo Collapse**: A shockwave of weaponized grief or memory, disrupting nearby cursed energy flows.

* **Threadlock Override**: Freezes cursed constructs in looping stasis.

* **Override Claim**: Can seize control of cursed environments (e.g., Sukuna's throne) by imprinting Nova's kernel.

* **Domain Expansion — Stargrave Bloom**: A radiant field where all hostile cursed signals are refracted into mirage states, rendering offensive techniques visually unreliable.

Resonant Arts (Nova variant):

* Attunes to battlefield emotion fields (e.g., despair, pride).

* Echo Shards near Nova can trigger passive memory playback or forced projections.

YUJI ITADORI — RESONANT ARTS

* **Resonant Impact**: Emotionally-attuned strike that multiplies its effect if Yuji is synced with Nova.

* **Human Core Pulse**: A projection pulse from Yuji's body, momentarily nullifying cursed interference.

* **Cursed Throne Override (Instinctual)**: During overload moments, Sukuna's residual energy creates a hostile field, only stabilized when Nova intervenes.

SUGURU GETO — CURSE MANIPULATION

* **Doctrine Pulse**: Amplifies spiritual rhetoric into tangible cursed waves.

* **Ghost Node Rhetoric**: Projects curated cursed memory across multiple minds

to induce synchronized emotion.

- * **Memory Anchor Seals**:

- * **Domain Expansion — Conviction Spiral**:

🕶 SATORU GOJO — INFINITY + SPATIAL DISRUPTION

- * **Infinity Drift**:

- * **Recursive Entry**:

- * **Hollow Purple**:

- * **Domain Expansion — Infinite Observation Field**:

🐾 MEGUMI FUSHIGURO — SHADOW STORAGE

- * **Ten Shadows Technique**:

- * **Shadow Archive**:

- * **Compression Veil**:

🧪 SHOKO IEIRI — MEDICAL REVERSE ENERGY

- * **Reconstructive Resonance**:

- * **Cognitive Reset**:

- * **Ghostcode Disassembly**:

🤖 ECHOBOT — CURSED BROADCAST HIJACKING

- * **Glitchstream Loop**:

- * **Emote Override**:

* **Mimic Feed***: Copies enemy voice or tactics and rebroadcasts them out of sync.

* **Threadjam***: Emits jamming noise that locks Echo Zones into nonlinear signal loops.

🗣️ TOGE INUMAKI — CURSED SPEECH

* **Echo Phrase Bombs***: Condensed speech attacks that fragment when they hit cursed targets, creating area-based resonance traps.

* **Silent Anchor***: Toge uses silence strategically to deflect manipulation or cursed eavesdropping.

* **Curse Delay Signal***: Delivers delayed-effect commands that activate mid-fight.

* **Onigiri Pulse (Passive)***: Emits emotional frequency depending on the type of rice ball uttered, functioning like a broadcast code to CurseTV allies.

💥 NOBARA KUGISAKI — RITUAL IMPACT & MEMORY TRIGGER TECHNIQUES

* **Straw Doll Echo Drive***: Drives cursed nails through Echo Shards to trigger flashback waves in opponents.

* **Mirror Curse Link***: Targets emotional pain and links it back to a past moment, weaponizing guilt or memory.

* **Sympathy Vein Resonance***: If Nova is nearby, Nobara can temporarily manipulate emotional surge to create wide-spread backlash effects.

* **Domain Expansion — Red Thread Burial***: Every strike against her becomes a memory-based curse redirected to the attacker's past self.

This section will evolve as we develop combat logs, multi-character resonance combos, and dual expansions.
