

## JKK REBOOT 8 — LORE GLOSSARY & SIGNAL LEXICON\*\*

---

### ### 📖 GLOSSARY TERMS

#### \*\*Echo Trap\*\*

A cursed-tech snare that captures a sorcerer's technique or thought loop in a recursive signal loop. Often deployed around Echo Zones by rogue tacticians or repurposed studio gear.

#### \*\*Kernel Spin\*\*

A temporary surge in cursed-tech hybrid users where the Kernel Core emits fluctuating outputs of memory, emotion, and signal. Dangerous if not anchored.

#### \*\*Signal Dampener\*\*

A cursed device used to suppress emotional resonance and disrupt broadcast frequency. Commonly used by Exorcist Agents to jam CurseTV streams or delay Domain deployment.

#### \*\*Threadlock\*\*

A cursed anomaly where memory, emotion, and energy bind into a recursive, stasis-like knot. Can trap cursed techniques mid-cast or cause feedback loops in cursed-tech users.

---

### ### 🧠 EMOTIONAL & MEMORY RESONANCE CONCEPTS

#### \*\*Ghost Burn\*\*

Occurs when an Echo Shard or ambient memory fragment tries to overwrite a sorcerer's identity. Symptoms include fragmented speech, hallucinated memories, and cursed scar emergence.

#### \*\*Memory Shard Containment\*\*

The process of isolating potent cursed memories into physical vessels (like echo orbs, needles, or nails). Shoko and Megumi both utilize containment as tactical or healing support.

#### \*\*Frequency Desync\*\*

When two cursed users fall out of emotional or signature resonance mid-technique. Results in failed fusion attacks or reversal feedback—common in dual expansions that aren't fully bonded.

---

This lexicon will expand as new cursed phenomena, fan terminology, or system tools emerge through RP, missions, or lore updates.
